Associate Package Consultant - recent graduates

Position Code : **397291BR**

Introduction :

As a Package Consultant at IBM, get ready to tackle numerous mission-critical company directives. Our team takes on the challenge of designing, developing and re-engineering highly complex application components and integrating software packages using various tools. You will use a mix of consultative skills, business knowledge, and technical expertise to effectively integrate packaged technology into our clients' business environment and achieve business results.

Your Role and Responsibilities :

Overview:

IBM is a global cognitive and cloud company changing the way the world works. We foster a culture of creative, innovative thinkers; people who are curious about how technology can transform businesses and impact the world. Our consultants are part of IBM Services where we engage with clients across every industry to deliver technology-driven solutions. We cultivate a diverse, inclusive, global team of people who want to pioneer, reimagine and disrupt the future.

Here's where you come in. We're looking for passionate, original thinkers who want to drive progress, grow their network and further their careers. If you see yourself as someone who never stops learning, who believes no problem is too big to solve, and who wants to unleash your potential, IBM Services is for you.

As an Associate, you'll be a part of client-facing teams as a consultant, developer, designer, data scientist, technical specialist or project manager to help businesses change the way they work.

Our clients' technical and business needs are constantly evolving. We're hiring inspired, talented individuals eager to apply their knowledge and perspective to challenging work that evolves industries and our world. We prioritize ongoing learning, development of technical skills, and continuous personal growth, all grounded in a culture of coaching and apprenticeship.

What we offer you:

IBM offers you a position in our 2-year GBS Associate program. In this program, you take part in real-life projects from day one, work with the brightest minds in the IBM organization at home and abroad and help us shape the market by transforming industries and professions with data and technology. The digital transformation is at the top of the agenda in the largest organizations where you as a consultant will be advising, designing and implementing innovative solutions for the future.

IBM GBS Associate Program can offer you several career paths based on your interest and aptitude. The world of consulting is varied: the path you as an associate take, and the velocity of your career progression, will largely be in your own hands within the framework of one of the largest and most varied consulting companies.

Associate Package Consultant:

Calling on technical thinkers to help us assists clients in the selection, implementation, and production support of application packaged solutions. You'll use in-depth consulting skills, business knowledge, and packaged solution expertise to effectively integrate packaged technology into the clients' business environment in order to achieve client expected business results. You'll be trained and become an expert packages for existing and new applications- such as SAP, Oracle, Salesforce, Microsoft Dynamics, Workday, or SharePoint solution suite and be well versed to speak with clients and make strategic recommendations.
